

Affiliate Price Comparison Web App — Updated Idea

Summary

This web app allows users to search any product and compare prices across multiple shopping platforms like Flipkart, Amazon, Meesho, Ajio, etc., in one place.

Existing Features

- Product search bar
- Product card view
- Multiple merchant prices
- Affiliate links
- Admin dashboard

NEWLY ADDED FEATURES

1. AI-based Best Deal Recommendation

The app highlights the best deal automatically by considering price, delivery time, ratings, and offers.

2. Coupon & Cashback Aggregator

Shows available coupons, bank offers, and cashback options for each product to maximize user savings.

Tech Stack

Frontend: React

Backend: Node.js + Express
